Today’s Speakers

Alexandra B. Klass  
Associate Professor,  
University of Minnesota Law School &  
CPR Member Scholar

Isaac Moriwake  
Attorney,  
Earthjustice Hawai‘i

Yee Huang  
Policy Analyst,  
CPR

Webinar Agenda

• Introduction: The Public Trust Doctrine  
• The Landscape: The Doctrine in Practice  
• The Roles: The Doctrine & State Water Laws  
• The Challenges of Using the PTD  
• Pioneering Ahead: Hawai‘i & the Water Resources Trust  
• Q & A
Special thanks to the Park Foundation for making this project possible.

About the Doctrine

“Of all the concepts known to American law, only the public trust doctrine seems to have the breadth and substantive content which might make it useful as a tool of general application for citizens seeking to develop a comprehensive legal approach to resource management problems.”

About the Doctrine

Trustee: The State

Trust Principal: Certain Natural Resources
- Traditionally, navigable waters and lands submerged beneath them
- Extension to all water resources

Beneficiaries: Present and Future Generations

Purposes: Certain Public Uses
- Traditional public uses: navigation, commerce, and fishing
- Modern public uses: recreation and environmental and aesthetic preservation

Generally, successful public trust cases fall into two categories:

<table>
<thead>
<tr>
<th>Litigant</th>
<th>Type of Case</th>
</tr>
</thead>
<tbody>
<tr>
<td>Environmental</td>
<td>Citing the doctrine as a limit on state action that relinquishes or compromises trust resources</td>
</tr>
<tr>
<td>Groups</td>
<td>San Carlos Apache Tribe v. Superior Court (Ariz. 1999)</td>
</tr>
<tr>
<td>The State</td>
<td>Citing the doctrine in support of state action that protects trust resources from private actors</td>
</tr>
<tr>
<td></td>
<td>Avenal v. State, 886 So.2d 1085 (La. 2004)</td>
</tr>
</tbody>
</table>
About the Doctrine

• Outcome? Improved management of natural and water resources
  - Require states to fulfill public trust duties
  - Require states to apply public trust principles in decision-making
  - Require states to democratize control over the use of trust resources
  - Require accountability and citizen empowerment

The Landscape

The Public Trust Framework

Common Law

Constitutional Provisions

Statutory Provisions
The Public Trust Continuum

- No real application, OR limited to traditional common law PTD
- Either
  - Expanded purposes, Expanded principal, Expanded to all surface water and groundwater, OR
  - A constitutional or statutory PTD Provision
- Expanded purpose, Expanded NIF* definition, AND
  - Expanded to all surface water OR groundwater
- A constitutional or statutory PTD provision

*Navigable-in-fact

The Roles: Informing the Discussion

- Riparianism
  - Eastern states
  - Reasonable Use
- Regulated Riparianism
  - Eastern states
  - Reasonable Beneficial Use
  - Public Interest Criteria
- Prior Appropriation
  - Western states
  - Beneficial Use
The Roles: Protecting Groundwater

“[T]he existence, origin, movement, and course of [ground] waters, and the causes which govern and direct their movements, are so secret, occult, and concealed that an attempt to administer any set of legal rules in respect to them would be involved in hopeless uncertainty, and would, therefore, be practically impossible.”

Houston & T.C. Ry. Co. v. East, 81 S.W. 279 (Texas 1904) (emphasis added).

Judicial Application

- Mono Lake (by implication), California Supreme Court
- Waiahole, Hawai’i Supreme Court

Legislative Action

- Grassroots campaign by the non-profit Vermont Natural Resources Council
- “It is the policy of the state that the groundwater resources of the state are held in trust for the public.” Vt. St. Ann. tit. 10, § 1390(5)
The Roles: Defending State Action

“[N]or shall private property be taken for public use, without just compensation.”

<table>
<thead>
<tr>
<th>Physical Takings</th>
<th>Regulatory Takings</th>
</tr>
</thead>
<tbody>
<tr>
<td>government action actually and physically displaces a private property owner</td>
<td>government action is tantamount to a physical taking</td>
</tr>
<tr>
<td>Just compensation required</td>
<td>“Background Principles” exception, including the public trust doctrine</td>
</tr>
</tbody>
</table>

The Roles: Filling the Gaps

“In the performance of this duty of resource allocation consistent with the public interest, the Public Trust Doctrine requires, at a minimum, a determination of the potential effect of the allocation of water on the present water supply and future water needs of this State.”

The Roles: Shaping the Rhetoric

“The beauty of the doctrine is that it makes old values new again. It is the wisdom of the ages applied to modern challenges. Its power in advocacy is that it is an old, entrenched doctrine.”

Chris Bzdok, Principal, Olson, Bzdok, & Howard P.C.

Limitations

- One of many legal tools
- Other developments in environmental law and natural resources management
- Overall increased state and federal role in environmental protection
- Challenges to Implementation
Pioneering Ahead: Hawai’i & the Water Resources Trust

Trust Resources
Trust Use

Trust Uses
Offstream Diversion: The Waiahole Ditch

Hawai‘i Water Law in a Nutshell

• Kingdom Law: Water as Trust
• Territorial Law: Shift to Prior Appropriation
• State Law: Reassertion of Riparianism and Public Trust Principles
  – McBryde/Robinson cases (1973 to 1989)
  – Haw. Const. art. XI, §§ 1, 7 (1978)
  – In re Waiahole Ditch, 94 Haw. 97, 9 P.3d 409 (2000), and its progeny
Waiahole Case Summary

I. “SCOPE” of the TRUST:

“[T]he public trust doctrine applies to all water resources without exception or distinction.... Modern science and technology have discredited the surface-ground dichotomy.... We see little sense in adhering to artificial distinctions neither recognized by the ancient system nor borne out in the present practical realities of this state.”

Waiahole, 9 P.3d at 445-47.

II. “SUBSTANCE” of the TRUST:

A. Purposes/Uses of the Trust.
   1. Traditional uses of Navigation, Commerce, Fishing
   2. Resource protection
   3. Native Hawaiian uses, e.g., kalo
   4. “Domestic” use

Waiahole, 9 P.3d at 445-47.
Waiahole Case Summary

B. State’s Powers and Duties.
   1. State’s “continuing authority... precludes any grant or assertion of vested rights to use water to the detriment of public trust purposes.”
   2. State has “affirmative duty” to take trust into account and protect it whenever feasible (citing Mono Lake).

3. Presumption favoring trust uses:
The trust “effectively prescribes a ‘higher level of scrutiny’ for private commercial uses.... In practical terms, this means that the burden ultimately lies with those seeking or approving such uses to justify them in light of the purposes protected by the trust.”
Waiahole Case Summary

4. More Trust Requirements:
   - must not act as an “umpire passively calling balls and strikes,” but take initiative to advance public rights
   - must consider cumulative impacts and implement mitigation, incl. alternative sources
   - planning and decisionmaking from “global, long-term perspective.”
   - “openness, diligence, and foresight”

Waiahole, 9 P.3d at 453-55.

Public Trust Tools

• Limitation on Transfer
• Shield against Takings Claims
• Process Mandate
• Preferential Burden Shifting
• Heightened Judicial Standard of Review
• Constitutional Foundation

• Public Trust as Paradigm/Discourse
Hawai‘i Nuances

• HI “Water Resources” Trust
  – Origins in Kingdom “common law”
  – Common, Overarching Public Trust
    “Principles”
• HI Water Code
  – Comprehensive regulatory framework
  – “[T]he doctrine continues to inform the
    Code’s interpretation, define its permissible
    ‘outer limits,’ and justify its existence,”
    Waiahole, 9 P.3d at 445.
